

Tugas Pertemuan Ke - 2

Bab 2 : KOMPONEN REACT NATIVE

Nama / NIM	Chris M.O.L. Da Costa / 2318101
Kelas	D
Nama Pengajar	Ivan Chandra (2318053)
Asisten Lab	Muhammad Alif AlBanna (2318045)
Judul (Sesuai Tema)	VokalTrack : Aplikasi Untuk Mencatat Latihan Menyanyi

1.1 Langkah – Langkah Membuat Komponen React Native (Hobi)

A. Langkah – Langkah

1. Colors.js

Source Code :

```
const colors = {
  grey: (opacity = 1) => `rgba(109, 125, 154, ${opacity})`,
  blue: (opacity = 1) => `rgba(53, 88, 225, ${opacity})`,
  white: (opacity = 1) => `rgba(255, 255, 255, ${opacity})`,
  black: (opacity = 1) => `rgba(0, 0, 0, ${opacity})`,
  darkModeBlack: (opacity = 1) => `rgba(27, 27, 27,
    ${opacity})`,
  darkModeBlue: (opacity = 1) => `rgba(146, 156, 241,
    ${opacity})`,
}
export default colors
```

2. Fonts.js

Source Code :

```
import {
  PlusJakartaSans_200ExtraLight,
  PlusJakartaSans_300Light,
  PlusJakartaSans_400Regular,
  PlusJakartaSans_500Medium,
  PlusJakartaSans_600SemiBold,
  PlusJakartaSans_700Bold,
  PlusJakartaSans_800ExtraBold,
} from '@expo-google-fonts/plus-jakarta-sans'; const fontType = {
  'Pjs-ExtraLight': PlusJakartaSans_200ExtraLight,
  'Pjs-Light': PlusJakartaSans_300Light,
  'Pjs-Regular': PlusJakartaSans_400Regular,
  'Pjs-Medium': PlusJakartaSans_500Medium,
  'Pjs-SemiBold': PlusJakartaSans_600SemiBold,
  'Pjs-Bold': PlusJakartaSans_700Bold,
  'Pjs-ExtraBold': PlusJakartaSans_800ExtraBold,
};
export default fontType;
```

3. Index.js

Source Code :

```
import colors from "../colors";
import fontType from "../fonts";
export { colors, fontType }
```

4. App.js

Source Code :

```
import {
  ScrollView,
  StyleSheet,
  Text,
  View,
  StatusBar,
  Image,
} from 'react-native';
import { SafeAreaView } from 'react-native-safe-area-context';
import { Bell } from 'lucide-react-native';
import { colors, fontType } from '../assets/theme';
import ListBlog from '../src/components/ListBlog';
import { useFonts } from 'expo-font';

export default function App() {
  const [loaded] = useFonts(fontType);

  if (!loaded) {
    return null;
  }

  return (
    <SafeAreaView style={styles.container}>
      <StatusBar barStyle="dark-content"
        backgroundColor={colors.white()} />

      <ScrollView showsVerticalScrollIndicator={false}>
        { /* HEADER */ }
        <View style={styles.header}>
          <View>
            <Text style={styles.title}>VokalTrack</Text>
            <Text style={styles.subtitle}>
              Aplikasi Mencatat Latihan Menyanyi
            </Text>
          </View>
          <Bell color={colors.black()} size={24} />
        </View>

        { /* BANNER */ }
        <View style={styles.banner}>
          <View style={{ flex: 1 }}>
            <Text style={styles.bannerTitle}>
              Latihan Vokal Setiap Hari
            </Text>
            <Text style={styles.bannerDesc}>
```

```
Catat progres latihan, teknik, dan perkembangan
suara kamu.
    </Text>
  </View>
  <Image
    source={{
      uri: 'https://images.unsplash.com/photo-
1511379938547-clf69419868d',
    }}
    style={styles.bannerImage}
  />
</View>

{/* CATEGORY */}
<ScrollView
  horizontal
  showsHorizontalScrollIndicator={false}
  style={styles.categoryContainer}
>
  <View style={styles.categoryItemActive}>
    <Text
style={styles.categoryTextActive}>Pemanasan</Text>
  </View>
  <View style={styles.categoryItem}>
    <Text style={styles.categoryText}>Teknik</Text>
  </View>
  <View style={styles.categoryItem}>
    <Text style={styles.categoryText}>Pernapasan</Text>
  </View>
  <View style={styles.categoryItem}>
    <Text style={styles.categoryText}>Pitch</Text>
  </View>
  <View style={styles.categoryItem}>
    <Text style={styles.categoryText}>Lagu</Text>
  </View>
</ScrollView>

{/* LIST LATIHAN */}
<ListBlog />
</ScrollView>
</SafeAreaView>
);
}
```

Stylesheet :

```
const styles = StyleSheet.create({
  container: {
    flex: 1,
    backgroundColor: colors.white(),
  },

  header: {
    paddingHorizontal: 24,
    paddingTop: 10,
    paddingBottom: 10,
    flexDirection: 'row',
```

```
        justifyContent: 'space-between',
        alignItems: 'center',
    },

    title: {
        fontSize: 24,
        fontFamily: 'Pjs-ExtraBold',
        color: colors.black(),
    },

    subtitle: {
        fontSize: 12,
        fontFamily: 'Pjs-Regular',
        color: colors.grey(),
    },

    banner: {
        flexDirection: 'row',
        backgroundColor: colors.blue(),
        marginHorizontal: 24,
        borderRadius: 15,
        padding: 15,
        alignItems: 'center',
        marginBottom: 20,
    },

    bannerTitle: {
        fontSize: 16,
        fontFamily: 'Pjs-Bold',
        color: 'white',
        marginBottom: 5,
    },

    bannerDesc: {
        fontSize: 12,
        fontFamily: 'Pjs-Regular',
        color: 'white',
    },

    bannerImage: {
        width: 80,
        height: 80,
        borderRadius: 10,
        marginLeft: 10,
    },

    categoryContainer: {
        paddingLeft: 24,
        marginBottom: 10,
    },

    categoryItem: {
        backgroundColor: colors.grey(0.1),
        paddingHorizontal: 16,
        paddingVertical: 10,
        borderRadius: 20,
        marginRight: 10,
```

```
    },  
  
    categoryItemActive: {  
      backgroundColor: colors.blue(),  
      paddingHorizontal: 16,  
      paddingVertical: 10,  
      borderRadius: 20,  
      marginRight: 10,  
    },  
  
    categoryText: {  
      fontFamily: 'Pjs-SemiBold',  
      color: colors.grey(),  
    },  
  
    categoryTextActive: {  
      fontFamily: 'Pjs-SemiBold',  
      color: 'white',  
    },  
  },  
});
```

5. ListBlog.jsx

Source Code :

```
import { StyleSheet, Text, View, Image } from 'react-native';  
import { colors } from '../assets/theme';  
  
export default function ListBlog() {  
  return (  
    <View style={styles.container}>  
      <Text style={styles.sectionTitle}>Latihan Terbaru</Text>  
  
      {/* CARD 1 */}  
      <View style={styles.card}>  
        <Image  
          source={{  
            uri: 'https://images.unsplash.com/photo-  
1508700115892-45ecd05ae2ad',  
          }}  
          style={styles.image}  
        />  
        <View style={styles.cardContent}>  
          <Text style={styles.cardTitle}>Pemanasan Vokal  
Dasar</Text>  
          <Text style={styles.cardDesc}>  
            Latihan pemanasan sebelum menyanyi agar suara tidak  
cedera.  
          </Text>  
        </View>  
      </View>  
  
      {/* CARD 2 */}  
      <View style={styles.card}>  
        <Image  
          source={{  
            uri: 'https://images.unsplash.com/photo-  
1516280440614-37939bbacd81',
```

```
    }}
    style={styles.image}
  />
  <View style={styles.cardContent}>
    <Text style={styles.cardTitle}>Teknik Pernapasan
Diafragma</Text>
    <Text style={styles.cardDesc}>
      Teknik pernapasan yang digunakan oleh penyanyi
profesional.
    </Text>
  </View>
</View>

  { /* CARD 3 */ }
  <View style={styles.card}>
    <Image
      source={{
        uri: 'https://images.unsplash.com/photo-
1493225457124-a3eb161ffa5f',
      }}
      style={styles.image}
    />
    <View style={styles.cardContent}>
      <Text style={styles.cardTitle}>Latihan Pitch
Control</Text>
      <Text style={styles.cardDesc}>
        Melatih ketepatan nada agar tidak fals saat
bernyanyi.
      </Text>
    </View>
  </View>
</View>
);
}
```

Stylesheet :

```
const styles = StyleSheet.create({
  container: {
    paddingHorizontal: 24,
    paddingBottom: 30,
  },

  sectionTitle: {
    fontSize: 18,
    fontWeight: 'bold',
    marginBottom: 15,
    color: colors.black(),
  },

  card: {
    backgroundColor: 'white',
    borderRadius: 15,
    marginBottom: 15,
    overflow: 'hidden',
    elevation: 3,
  },
});
```

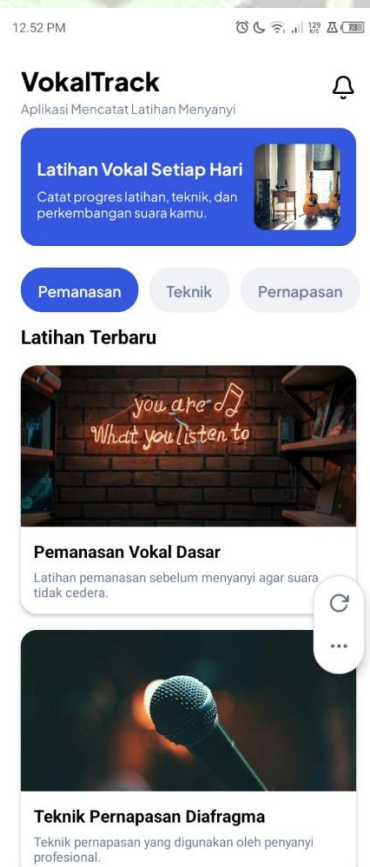

```
image: {
  width: '100%',
  height: 150,
},

cardContent: {
  padding: 12,
},

cardTitle: {
  fontSize: 16,
  fontWeight: 'bold',
  marginBottom: 5,
  color: colors.black(),
},

cardDesc: {
  fontSize: 12,
  color: colors.grey(),
},
});
```

Hasil Tampilan :

Gambar 1.1 Tampilan Awal VokalTrack

Analisa :

Tampilan aplikasi VokalTrack terlihat rapi dan mudah dipahami sejak pertama dibuka. Bagian header langsung menunjukkan identitas aplikasi, sementara banner membantu menarik perhatian pengguna untuk mulai latihan vokal.

Menu kategori yang disusun horizontal membuat pengguna lebih mudah memilih jenis latihan yang diinginkan. Selain itu, daftar latihan ditampilkan dalam bentuk card sehingga informasi terasa lebih jelas dan nyaman dilihat. Secara keseluruhan, tampilannya sederhana, enak dilihat, dan mudah digunakan oleh pengguna.
